EasyTau

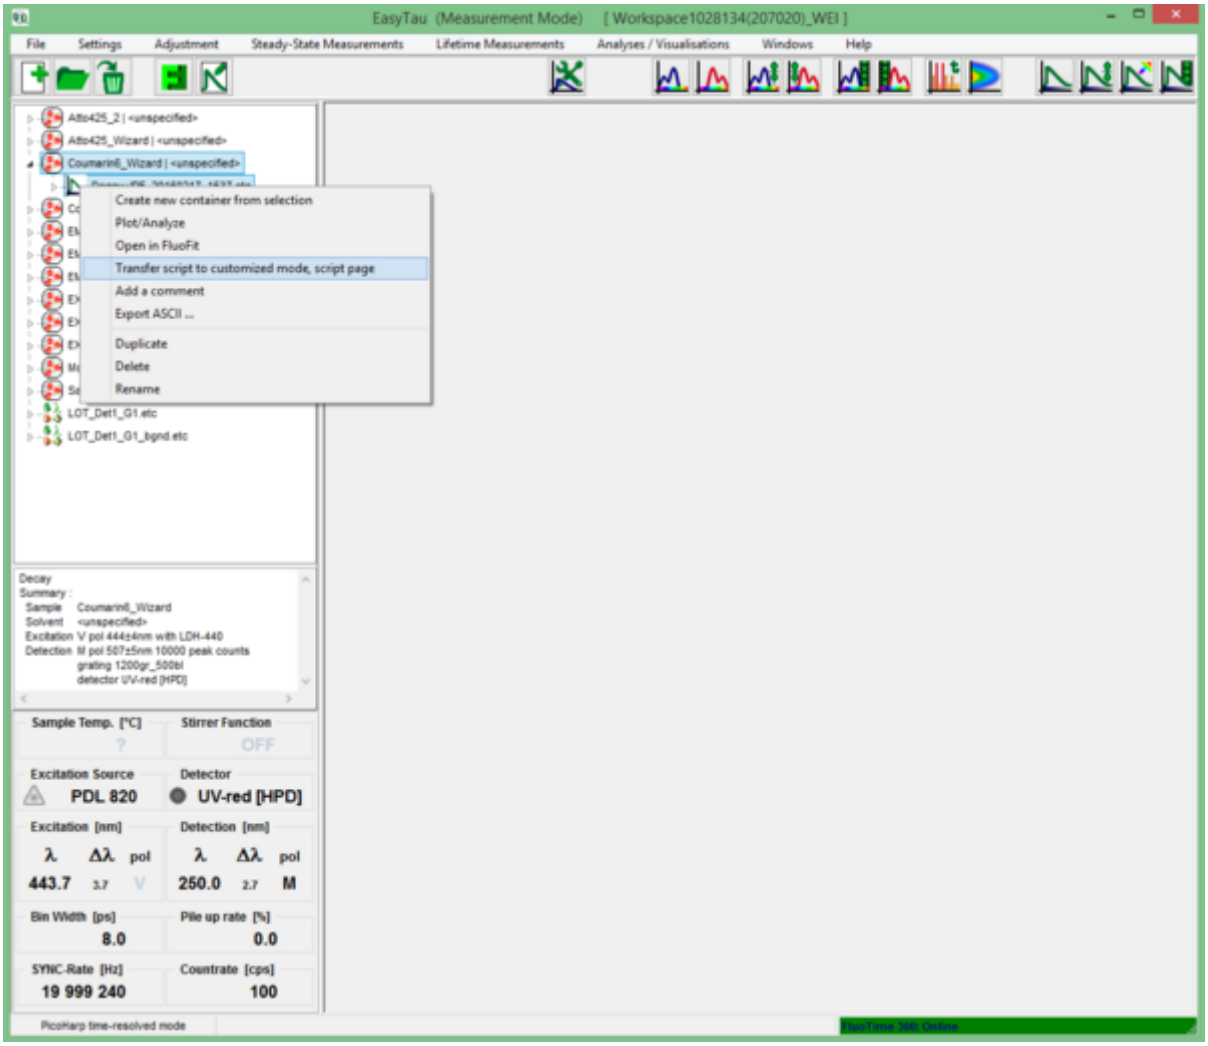

Scripts

EasyTau features a scripting language to automate more complex experiments. Examples of EasyTau scripts can be found on github: https://github.com/PicoQuant/EasyTau-Scripts

Create a Script from a wizard measurement

The easiest way to start with scripting measurements in EasyTau is to acquire a measurement with a wizard and then create a script from this measurement.

- Create a data set using a wizard of your choice
- Right click on the data set
- Select `Transfer script to customised mode, script page`

- Adjust to your liking
